

CELL

2019 has been a challenging year from a market perspective. Many of our customers and suppliers have been suffering from declining markets, experiencing difficulty with the trade war between China and the United States, and other complications. Despite this, CellMark has managed to make continual financial progress and stay profitable. All this, thanks to our dedicated employees who know how to be agile and flexible when circumstances change unexpectedly. Once again we have proven that we know how to succeed, not only in good times, but also in times of difficulty.

During the year, we continued the previous year's strategy of growing our core business and concentrating our activities within our seven existing operating divisions. In line with this strategy, we completed the wind down of CellMark Medical. Despite a lot of effort spent trying to redirect the business, it turned out to take far longer than expected to develop a profitable project. We considered our investments to be better spent on our well-established activities.

Adding value to our core areas will help us to keep building upon the successful company foundation that, so far, has given us more than three decades of profitable business. Our focus going forward will be to reduce transaction costs to stay competitive and remain relevant for the future.

In 2019, we celebrated CellMark's 35th anniversary. Looking back over these years of profitability and development, we are utterly proud of our growth story and our strong global position as a world-class marketing and supply chain service company. We are also grateful to our partners and for their continued invaluable support.

By division, CellMark Paper started out 2019 strong by resuming profitability after a period of struggle in 2018. CellMark Packaging suffered from a tough market development but managed the circumstances satisfactorily. CellMark Pulp had a successful year. CellMark Recycling experienced a rapid downturn in market conditions while still delivering profits. Our Chemicals division suffered from direct as well as indirect effects of the trade war. CellMark Basic Chemicals had a very tough year. Our Metals Division continued its restructuring and rightsizing, and CellMark Energy entered into new promising engagements.

Moreover, we focused on providing more efficient technology platforms for our organization, as well as for our partners. We launched a new intranet, a new external website, and a new e-learning platform for our employees to use for improving their skills in different work areas. We made the decision to upgrade our Enterprise Resource Planning (ERP) from IFS 8 to IFS 10. A necessary improvement.

As a global company with people located worldwide, it is of high importance to provide common platforms and tools where we all can unite and communicate. This will not only facilitate our employees' daily work, but also ensure that we can bring more value to our customers and suppliers. Our vision will always be to Surpass Expectations.

Nonetheless, our vision also applies to the surrounding world and the communities in which we work and live. We demonstrate our principle, that we care, by continuing our support of the PaperSeed Foundation, a non-profit organization dedicated to strengthening educational opportunities for children and youth around the world. This year, we also published our first stand-alone Sustainability Report.

Worth mentioning, 2019 was my very first year as the CEO of CellMark. I entered my new role with a lot of enthusiasm, and I am closing the books on 2019 with that same feeling. I am proud and grateful for what we have accomplished together this year, and wish to thank all employees and business partners for their contribution and support.

Now, we are ready for a new decade.

Christer Simrén

President & CEO

We deliver products, services, and solutions to the world market

CellMark is a privately owned independent marketing and supply chain service company providing products, services, and solutions to customers and suppliers all over the world. We facilitate trade and business development across multiple industries using our vast network of local offices and professional expertise.

Founded in 1984 in Gothenburg, Sweden, CellMark has its roots in the international trade and distribution of raw materials related to the global Pulp and Paper Industry. Over the years, we have developed world-class marketing and supply chain service capabilities and expanded into new product areas. Today, we run seven successful international divisions in Pulp, Paper, Packaging, Recycling, Chemicals, Metals, and Basic Chemicals. We have also grown operations for plastics and biomass for energy.

Through a network of 70-plus offices in 30-plus countries, we provide a full suite of services and partner with clients to identify new business opportunities that add value to processes and products: sourcing, sales & marketing, exclusive representation, finance, logistics, regulatory compliance, and, in some areas, research & development and custom manufacturing.

With our vision, Surpassing Expectations, we commit to improve every day, supporting our clients in every action we take.

The CellMark Group consists of more than 800 professionals with in-depth product and market knowledge and extensive, long-term relationships in the industries we serve. The company is privately held and owned by its employees and an outside corner investor, Ernström & Co., who helps us achieve our strategic objectives. Our annual sales are approximately USD 3 billion, with volume of almost 7 million tons annually. CellMark takes pride in contributing to global sustainability efforts and is committed to strengthening educational opportunities in support of the PaperSeed Foundation.

For more information please go to www.cellmark.com.

The Pulp Division enjoyed a very successful 2019 despite the significant head winds in both the Pulp and Energy markets. I am very pleased with our progress on our Strategy Map goals and 2019 saw many of them reaching a successful conclusion.

The global pulp market was beset by a massive price correction in the first quarter of 2019 whereby excessive inventory (particularly in China) drove pricing to its lowest levels in many years. This caused a tremendous amount of uncertainty for both customers and producers alike as "price discovery" became the topic. Our Pulp team was able to navigate these choppy waters by providing our partners current and insightful updates on the rapidly changing sales environment. Our continued investment in local, on the ground offices means that we are closer to our customers than ever before.

Similarly, the energy and caustic markets saw similar macro price corrections in line with the global commodity price erosions. The Division's ability to provide ongoing sales opportunities despite these massive changes was welcomed by our partners. The Energy group saw biomass pellet pricing slump in both the residential and industrial markets as warm winter weather and changing support mechanisms negatively influenced price expectations. Nonetheless, we continued to find commercial solutions to maintain continuity for both our producers and customers alike. The Energy and Caustic group had their best year ever.

The Pulp Division was pleased to participate in CellMark's global 35th anniversary celebrations and individual commemorations took place on each continent. Since the Pulp Division was the genesis of the company's founding it was a particularly proud moment. Pulp was also extremely focused on bringing in new team members in 2019 to support our growing business which took the form of several new agencies and the conclusion of two core long term agreements with our partners.

The focus for 2020 will be on the continued growth path for the Division. As the world becomes more complex and interconnected the need for professional, dedicated sales and supply chain specialists remains critical. I want to personally thank our customers and suppliers for their support in 2019 and give a special thanks to my team who performed magnificently.

Doug Smith
Pulp Division President

Despite a challenging marketplace, the Paper Division's 2019 results improved greatly when compared to the previous year. The unprecedented supply and demand challenges in 2018 certainly softened and, as a result, provided new opportunities. Stronger divisional returns were the product of improved performance within all regional offices and our continued focus on administrative cost controls, working capital management, and product mix expansion.

Our international business continued to expand, primarily in Southeast Asia. Many of the Asian markets are still in expansion mode as the countries modernize and demand for written material grows. Our LATAM business also increased in 2019 with particular emphasis on new markets and new specialty paper grades.

Our worldwide paper business continues to diversify outside of traditional printing and writing grades. The printing and writing paper segments remain a focal point within each region, but we have re-focused our team to include specialty paper grades for our future business planning.

Equally as important, we remain highly focused on ensuring that our paper business costs are aligned with our ever-evolving business. In 2019, we embarked on an ambitious path to restructure our business and create a more nimble platform that can adapt to our constantly changing marketplaces. These difficult decisions helped further reduce costs while improving overall performance. It remains one of our primary objectives; to continually analyze our overall divisional cost structure and remain a competitive low-cost service provider for our suppliers and clients. In addition, we work tirelessly around the globe strengthening our relationships with best-inclass suppliers. Our geographic footprint positions us to offer unique solutions to both our supply partners and customers around the world.

We have recently entered into long-term strategic alliances with key suppliers and customers. These alliances will help ensure a more stable supply platform for them in the future. In 2019, CellMark Paper relied on our supply partners more than ever, and we are extremely grateful for their loyalty, support, and long-term commitments. We would also like to

thank our customers who are extraordinary partners. We look forward to continued cooperation and further building our relationships in 2020. In addition, we are very grateful to our committed, loyal, and hardworking employees – the lifeblood of our division.

In summary, CellMark Paper is adapting and evolving with our ever-changing global paper markets. We are managing our cost base and focusing on new paper segments within our business. We are confident in our strategy, suppliers, clients, and our team as we proceed into 2020 and beyond.

Joe Hoffman
Paper Division President

15 years ago, a trend of supplier consolidations started in the paper & board industry and converting sectors packaging companies. One anticipated result of this consolidation was that the historical swings of supply and demand would be tempered, and the industry might find more stability and balance, with less commodity pricing influences. Over the past two years we have been through a complete peak and trough cycle with many grades of packaging products so it seems the trend of aggressive market swings may continue.

Throughout 2019, we continued to be impacted by geopolitical issues that changed the flow of products within Asia and with North America. The reduction of wastepaper imports to China created more import demand of packaging papers and other fiber, but import tariffs caused some traditional supply points to be restricted. European packaging activity was stagnant. New supply and declining prices were a common theme in many market areas. E-commerce and substitution to paper packaging were the few areas of strength in global packaging markets during the year.

2019 saw pricing of some packaging grades reduced by 50 percent from peak pricing in 2018. Many customers took time to reduce heavy inventories built in 2018, which reduced demand for new product input. The swing to a buyer's market also caused us to be alert to payment issues so we took conservative positions in many regions. These impacts reduced our revenue and thus reduced our net profit significantly.

Our strategy continues to focus on geographic growth and adding more products to our supply mix. Value-added grades, with higher technical attributes, will become a larger part of our global sales. This will help increase our overall average price mix and give more stability in segments that are less volatile. We will start to see the results of this activity during 2020.

By year-end, it seemed that supply and demand had reached a balance point. Growth expectations are showing small improvements for 2020, which will improve demand for packaging grades. The next swing of the cycle begins.

Paul Busnardo
Packaging Division President

2019 was a stressful year for our group and the Recycling Industry as a whole. It seemed that when things could not get any worse, they did. Prices for recyclables (mainly paper and plastics) plummeted to levels not seen in over 30 years, and recycling became a worldwide crisis.

Exports of Recovered Paper from North America were down 12 percent from 2018, and U.S. domestic consumption was down almost 5 percent. The demand for recyclables was lacking and mills took market related downtime worldwide – something we had not seen in recent memory. Hardest hit was mixed paper with producers having to pay as much as USD 35 per ton just to move their material.

There was uncertainty throughout the year as governments followed China's lead in banning certain recyclables from their countries. India put a total ban on plastics, as China had the previous year. The Philippines shipped containers of plastics back to Canada, claiming they were full of rubbish, and threatened to declare war on them if they did not accept the returned containers.

Indonesia, whose purchases of U.S. wastepaper has almost tripled since China implemented its policy of gradually eliminating the import of recyclables, imposed strict, often excessive, regulations on the importation of recyclable commodities no less than three times. Costly and cumbersome inspection protocols were hastily rolled out. The stringent new quality specifications brought shipping in that market to a screeching halt upon each new release of the customs requirements.

In these turbulent markets, our group stayed true to our overall game plan of being diversified within the space. We continued to grow our U.S. trading group and significantly increased our European footprint. From a financial perspective, things could have been worse. Our year over year results were down 35 percent.

Looking to 2020, we are confronted with the coronavirus and associated problems being caused in the worldwide economy as a direct result of it. But this too shall pass. Goodbye 2019.

Jimmy Derrico
Recycling Division President

Global industry conditions in specialty chemicals were rather challenging throughout 2019. We have seen general slowdowns in many of the geographic areas where we are present. In the North America region, particularly in the United States, we have had to deal with the crippling effects of the tariffs that were imposed on Chinese goods. This has caused much angst among consumers, who have worked diligently at mitigating those cost increases as much as possible, and came mostly at the expense of the supply chain channels.

In Europe, we experienced a slowdown in the automobile and durable goods sectors, which had ripple effects on the infrastructure set up to support those markets. In Asia, we saw a slowdown in China's productivity, which now represents the largest economy in that region and acts as a bell-wether for the health of many of the surrounding economies – both large and small – in northeast and southeast Asia.

The global slowdowns that occurred in 2019 have caused many specialty and commodity chemical companies to downgrade their forecasts throughout the year and CellMark Chemicals was no exception. Our full year earnings did not exactly measure up to our original projections, which on the surface is unfortunate but, at the same time, understandable given the macroeconomic conditions. Despite the down year, the Chemicals Division still managed to post a respectable profit that greatly helped towards the overall Group results. The diversification of our supplier and product portfolios, along with the resiliency of our dedicated employees, enabled us to produce decent results in what otherwise could be considered a down year for the global specialties industry.

Despite some of the challenges faced throughout 2019, we experienced several bright spots along the way. We made considerable progress in the construction of our new Food Ingredient Nutraceuticals facility, located in Naugatuck, USA. It will house our AnMar business unit, which is in the process of being rebranded as CellMark Ingredients. The new 5,000 square meter facility will have production, warehousing, and enhanced laboratory capabilities

to meet the growing needs of our customers in the dietary supplement market. We expect to complete construction and move-in in May or June 2020.

Throughout the year, we also added some new supplier relationships that have bolstered our presence in various sub-markets, particularly in the areas of flavor and fragrances, dietary supplements, pharmaceuticals, and paper chemicals. We continue to leverage against our own strengths and initiate cross-regional projects within the Chemicals Division, and between CellMark Divisions, thereby creating value for our suppliers who endeavor to grow outside of their home markets.

2019 brought new commercial opportunities in all areas of our business and we continue to grow in new geographies. In 2019, we expanded our footprint into the energy rich Gulf Coast Countries and have started delivering CellMark custom manufactured products that go into gas processing applications.

Even though 2019 proved to be a challenging year for the Chemicals Division, the fundamentals of our business remain strong and will allow for continued stability and earnings for years to come. We are grateful for the continued support and cooperation received from all our business partners and from the CellMark Management Team, the Board of Directors, and our employees who make it all possible.

Hugo Galletta Chemicals Division President

2019 was a challenging year for the world economy. Times have become more uncertain with complex geopolitical situations including armed conflicts and trade protectionism. The markets for raw materials and natural resources have become more volatile. The behavior of financial markets, including currency exchange and interest rates, makes the understanding of international trade and the role and flows of commodities even more complex.

We at CellMark Metals aim to have an independent long-term role in the market. We are a small to medium-sized worldwide physical trader and distributor of metallurgical raw materials, mainly to the Steel and Aluminium Industry. Our business model and core strategy is to provide logistical services to producers and consumers of industrial raw materials, both as agents and proprietary position takers. Our business relies on managing global supply chains of the commodities we handle, in the most efficient and reliable manner, thereby mitigating risk and adding value.

To survive the challenges, our trading team must be committed, disciplined, and adaptable, with the objective to build and maintain a strong position in the global markets where we are active. We serve producers and consumers and participate in the transition to a greener economy by supplying Nickel, Copper Aluminium, and Manganese, which are essential in the production of electric batteries.

CellMark Metals is diversified and organized into four business units:

- Non-Ferrous Metals
- Ferrous Metals
- Foundry Products
- Light and Specialty Metals and Ores

During the second half of 2019, the restructuring of CellMark Metals continued by downsizing and closing some of our European and Asian offices. The intent is to centralize the commercial and operational activity to our Stockholm office. Our newly opened small satellite offices in Beijing and Seoul performed well. Despite the challenging environment, we achieved a good operational result for 2019.

At CellMark Metals, we are spending a great deal of time developing a strong corporate culture, following CellMark Group's rules and recommendations on:

- Code of Conduct
- Guiding Principles
- Onboarding Rules
- Corporate Social Responsibility

The commodity business is transparent and very competitive. Despite the difficulties mentioned, our market sentiment for 2020 is positive. We continue to focus on building a sustainable business for now and for the future.

Claes Lundman

Metals Division President

An eventful 2019 has passed, featuring a global manufacturing downturn, major supply disruptions in chemicals and energy, government policy changes, and both escalation and de-escalation in the China–United States trade war. Prices of most basic chemicals have decreased, creating downward pressure on the sales revenues.

Geopolitical issues in various countries in MEA, LATAM, and Asia created an uncertain market environment and increased financial risks. Subsequently, we were forced to review and delay several running operations and new projects in those regions. Demand for most basic chemicals was stagnant, leading to an increased level of competition and lower margins.

Despite the challenging global markets, our division has managed to successfully navigate towards the growth targets outlined in our divisional strategy, further develop our global footprint, and invest in new sales markets such as North America and Asia.

As a result, our tonnage in 2019 increased by 9 percent as compared to 2018. The division has delivered 325 thousand tons of products and continuously served 14 industrial sectors in more than 40 countries over 5 continents. We are proud of having grown our position as a preferred and well recognized supplier in the global market.

We expect 2020 to be a pivotal year for the chemical sector. The overall manufacturing outlook remains challenging, but the emerging de-escalation of trade tensions is expected to boost confidence, trade flows, and investment.

In the new year, Basic Chemicals Division will be looking at:

- Harvesting good returns from the business development in both Asia and MEA.
- Focusing on our distribution businesses in Europe and Turkey, which traditionally contributes good returns.
- Further developing our position in North America as a lucrative market for basic chemicals.
- Capitalizing on our strengths as a global player with emphases on large bulk trades in the growing markets of Asia and MEA, and in the traditional markets of Europe, and the Mediterranean.

We are confident that the actions taken in 2019 will bring positive returns and will consolidate our business around our core competencies while keeping close control on cost.

As outlined in our divisional strategy, we will continue to follow our key growth drivers:

- Review and improve our existing business.
- Expand our business in new geographies.
- Expand and diversify our product portfolio.

We, as a proud team of 42 professionals located in different countries on 4 continents, would like to thank all our colleagues for their support and our business partners around the globe for choosing CellMark Basic Chemicals!

Ersin Alkan

Basic Chemicals Division President

Sustainability is integral to our core business

CellMark participates in initiatives to ensure global sustainability and ecological health; we are eager to join with our business partners to create a more just and sustainable world.

Recycling is a major part of the CellMark story. Each year, we increase the amount of waste diverted from landfill by cycling it back into global trade for a second life. We continually seek out opportunities for our core business areas to support sustainable practices and products, whether that be alternative energy, green chemistry, certified forestry products, or sustainable textiles.

Our Guiding Principles are the bedrock of all our actions. Integrity is the foundation of our relationships, with each other and with our business partners. Our Code of Conduct, anti-corruption, and whistle blower policies further exemplify our commitment to perform our services and business activities with a high degree of ethics.

We embrace the challenges involved in creating innovative solutions for our partners, and we take pride in contributing to global sustainability efforts.

To read CellMark's full Sustainability Report, please visit www.cellmark.com

CellMark works in support of the United Nations Sustainable Development Goals.

Quality Education

CellMark is a partner of the PaperSeed Foundation, underwriting all operations and administrative expenses, enabling 100 percent of all donations go directly to helping kids. During 2019, with CellMark's support, the PaperSeed Foundation worked to strengthen the education of 300,000 children in 9 countries.

Affordable and Clean Energy

CellMark Energy is a global leader in the production, trade and proliferation of biomass-based alternative fuels and waste-to-energy commodities. Further, in our lignosulphonate commodity trading, CellMark supports reduced energy usage in the production of ceramics and clay bricks, coal briquettes and recycled paper.

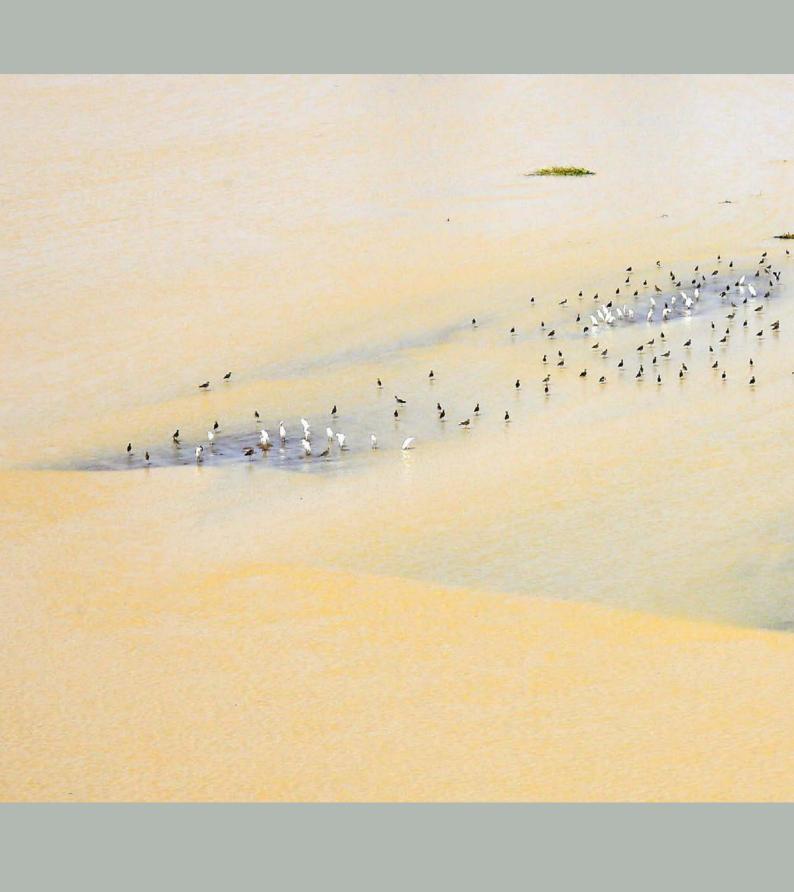

Sustainable Cities and Communities

Recycling is one of our core business areas. We strive to keep waste in the recycling stream and out of landfill. We operate four recycling plants in North America and three additional plants as joint ventures. Our commitment to sustainable cities can be seen in the 1,898,293 tons of recycled products we sourced and traded globally in 2019. Further, our recycling division supports a nonprofit recycling plant that helps rehabilitate people struggling with addiction return to their communities as productive members of society.

Life on Land

CellMark maintains a broad range of third-party certifications, including those from the Forest Stewardship Council® (FSC®), and the Program for the Endorsement of Forest Chain of Custody Standards (PEFC®). These certifications demonstrate our commitment to sustainable, intelligently managed forestry, which makes trees a renewable resource and keeps the world's woodlands healthy and productive.

1984

Cellulose Marketing International AB is founded in Gothenburg with 21 employees. Five overseas sales offices are established. In 1997. the company name is changed to CellMark.

CellMark is now 100% employee owned. We acquire Pacific Forest Resources Inc. (PacFor), adding packaging paper & board and recovered paper to our existing base in market pulp and whitepaper.

1990

We reach the 1 million ton mark and sell our products in 36 markets. In 1991 we add chemicals to our product portfolio.

During the 1990s, CellMark acquires American Paper Sales and Perkins Goodwin in the US and Unifibra in Europe. Singapore Pulp Private Ltd (SPPL) is established in Singapore.

The 2 million ton mark is realized. We become ISO-9001 certified and acquire our first Recycling plant.

Group sales exceed one billion US dollars. We acquire Gothia Paper AB and Larsson Paper AB.

Over 3 million tons of pulp and paper are sold to over 100 markets. Most subsidiaries are consolidated under the Cell-Mark brand name.

CellMark celebrates its 20th anniversary and reaches a sales volume of more than 4 million tons.

2006

CellMark now has 37 offices around the world. We become FSC® and PEFC® certified.

CellMark celebrates its 25th anniversary and maintains the 5-millionton record reached in 2007. We acquire Fibres International and CellMark Recycling now operates 10 recycling facilities in North America.

CellMark Acquires Sicutec AB, a supplier of second-hand machinery and equipment to the pulp and paper industry.

A significant acquisition is completed. With Alcan International Network onboard, CellMark operates two new divisions: CellMark Chemicals and CellMark Metals. Further, the company acquires NorCell in the USA and Axe Papier in France.

Several new business lines are established: Basic Chemicals and Waste-to-Energy. CellMark is established as a leading supplier of Biomass to energy in France.

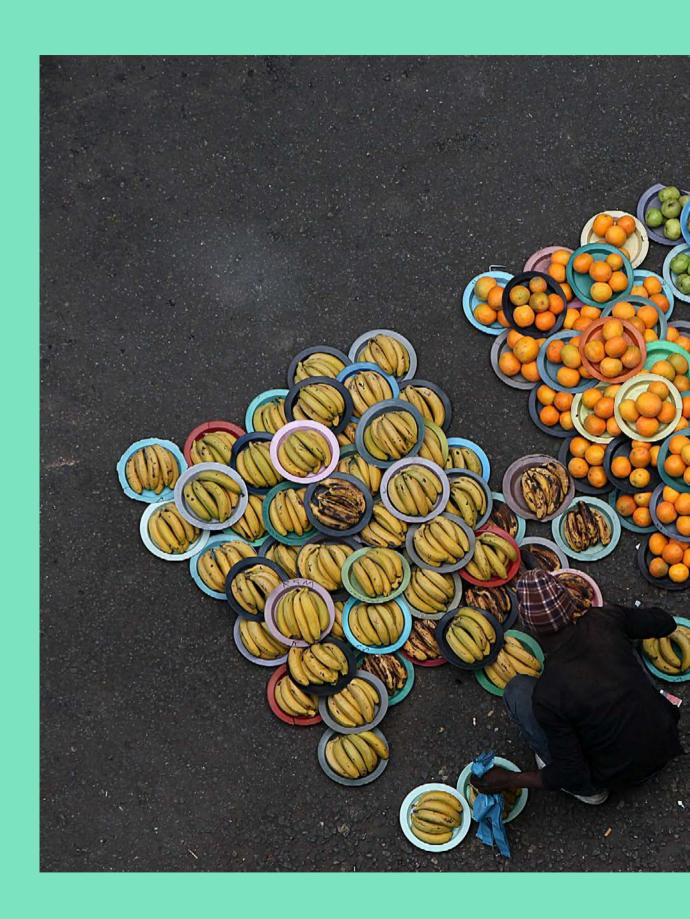

CellMark celebrates its 30th anniversary. Together with Norske Skog we form NorCell Asia. The addition of Sonaco Stockholm-Trading AB, a based metals trading company and AnMar International Ltd, a nutraceutical ingredient company, broadens our network as well as our product portfolio and service capabilities.

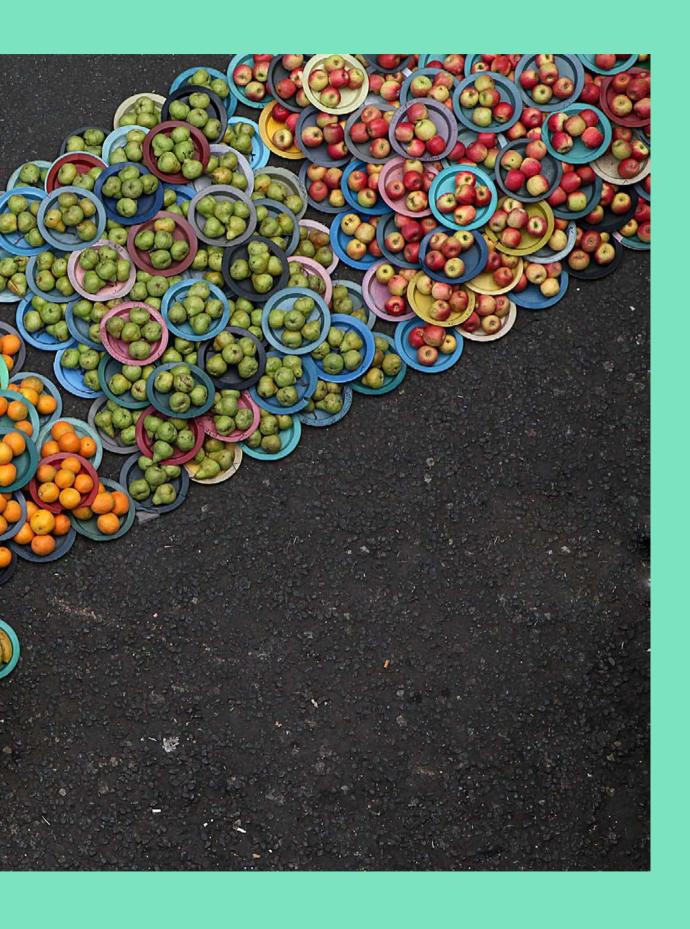

We acquire Semper Exeter in North America, a distributor and converter of paper, paperboard, plastics and films. a shareholder A new long-term in CellMark adding investor, Ernström new skills and direction & Co, becomes to the company.

Volumes reach 7 million tons and CellMark begins reporting on its sustainability practices.

2019

CellMark celebrates its 35th anniversary and publish its first stand-alone Sustainability Report. The **Energy and Caustic group** had their best year ever.

Director's Report

The Board of Directors hereby submits a brief summary of the Group's consolidated financial statements and highlights for the financial year 2019. The statutory Annual Report, including the financials of the parent company and complete supplementary information, can be obtained from the company or the Swedish Company Registration Office ("Bolagsverket").

Operations

CellMark AB, together with subsidiaries and associated companies, markets paper, packaging, pulp, chemical, basic chemical, metal, and recycling products.

Significant Events during the Financial Year

At the beginning of 2019, Christer Simrén joined CellMark as the company's new CEO. Christer Simrén has extensive experience as a leader in large business organizations, with industry experience from the packaging, pulp, and forest industry. Christer Simrén is employed by the parent company CellMark AB.

During the year there have been two additions to the Group: CellMark Netherlands BV and CellMark Vietnam. The Group holds 100 percent of the shares in both companies.

The Group sold its shares in the Associated company Asia Pellets Co. Ltd. The Group subsidiaries CellMark Medicals LLC and Tri State Properties LP have been liquidated in 2019. There have been no additional significant events besides what has been stated

Group Identification

CellMark AB is a subsidiary of CellMark Investment AB, company registration number: 556737-1959.

Foreign Branches

The Group has representative offices in Poland, Shanghai, Qingdao, Taiwan, and Korea.

The Use of Financial Instruments

Hedge accounting is conducted in accordance with the Group's financial manual and entails the hedging of open currency positions against the legal entity's local currency.

Risk Management

CellMark has defined the risks in its business model and has well-developed processes to reduce such risks. The Group has clear policies to handle credit and currency exposure, inventory and trading and for investment and acquisitions.

Price and product risks are covered as we conclude back-to-back transactions with suppliers and customers. CellMark sells counterpart and political risks in the insurance and banking markets, where CellMark also covers its foreign exchange expo-

sures. CellMark also have a Code of Conduct that all employees are obliged to follow.

Expected Future Development

The effect of the COVID-19 pandemic on the Group is still unclear. The pandemic has started to have an impact on supply chains and customer's and supplier's ability to send and receive goods. It is also an uncertain time for the world economy, and this could influence the Group's ability to generate sales over time. At the time of the Annual Report, it's difficult to estimate the long-term impact that the virus will have on our business. The Board and Management are closely monitoring the development and takes continuous measures to limit the adverse effects on the Group.

Sustainability Report

Information about the company's Sustainability Report can be obtained from the company's website www.cellmark.com.

Accounting and Valuation Principles

The Annual Report has been prepared according to the Swedish Annual Accounts Act and BFNAR 2012:1 Annual Accounts and Consolidated Accounts (K3).

The accounting principles are unchanged compared to the prior year.

Consolidated Financial Statements

The consolidated income statement and balance sheet include all companies in which the parent company directly or indirectly holds more than 50 percent of the shares or voting rights, see note 14.

All acquisitions of subsidiaries have been recorded according to the purchase method. Untaxed reserves reported in the individual group companies are divided in the consolidated balance sheet as a capital part and a tax part. The capital part has been accounted for under equity. The tax part is accounted for as an allocation under deferred taxes.

Companies acquired during the year have been consolidated from the acquisition date.

Participation in associated companies have been reported according to the equity method. Companies where CellMark holds between 20 and 50 percent of the voting rights are treated as associated companies. The equity method means that the acquisition cost for the shares, adding the change in the associated company's equity after the date of acquisition, is accounted for under the heading "Participations in Associated Companies" in the consolidated balance sheet.

The current method has been used in translating the income statements and balance sheets in foreign subsidiaries into Swedish kronor. All assets and liabilities in the foreign subsidiaries' balance sheets have been translated at year-end rate and all items in the income statements have been translated using the average rate of the year. Translation differences arising have been entered directly as equity.

Receivables and Liabilities in Foreign Currency

Receivables and liabilities in foreign currency have been translated at the rate of exchange at year-end. The difference between the acquisition value and the value at

year-end has been accounted for as income/expense. Receivables and liabilities that have been sold forward have been valued at the closing rate.

Income Recognition

Income is recorded at the fair value of the amount the Company has received or expects to receive. Deductions are made for any discounts that are provided.

In the sales of goods, income is generally recognized when the significant benefits and risks associated with the ownership of the goods have been transferred from the company to the buyer.

Interest income is recorded as income in accordance with the effective rate method.

Recognition of Leases

Leases that means that the economic risks and benefits in its substantial has been transferred from the lessor to a Group Company classifies as a finance lease. Assets that are leased via finance leases are accounted for as tangible fixed assets while future leasing fees are recorded as liabilities.

When a lease is first recognized, the asset and the liability are recognized as the present value of the future minimum leasing fees and any residual value. When calculating the present value of the minimum leasing fees, the implicit interest rate of the agreement is used. Operating leases are recognized as a cost linearly over the period of the lease.

Remuneration to Employees Postemployment

The parent company and the group have both defined contribution and defined benefit pension plans. Pension plans classified as defined contribution plans are those where fixed fees are paid and there is no obligation to make any payments other than said fixed fees. Defined benefit plans are accounted for in accordance with paragraphs 57-131 of the International Accounting Standard IAS 19 Employee Benefits. Fees for defined contribution plans are recognized as a cost for the period in which the employees render the services from which the obligation stems. The Group records defines benefit obligations in compliance with the exemption rule of BFNAR 2012:128.22.

The parent company and the group have defined benefit plan obligations that are exclusively dependent on the value of the endowment insurance policies held by the company and the group. Endowment insurance policies are recorded as financial assets. In compliance with the exemption rule of BFNAR 2012:1, pension obligations are recognized as a provision of equal value to the book value of the concerned endowment insurance policy.

Income Tax

Current tax is income tax the financial year and relates to the taxable profit for the year and the share of income tax for previous financial years that has not yet been recognized.

Deferred tax is income tax on taxable profit relating to future financial years as a result of past transactions or events.

Deferred tax is calculated on the basis of temporary differences. A temporary difference arises when the book value of an asset or a liability differs from its value for tax purposes. Temporary differences are not taken into account in the case of differences attributable to investments in subsidiaries, affiliated companies, associated companies, or joint ventures if the company can dictate the time of the reversal of the temporary difference and it is not evident that the temporary difference will be reversed within the foreseeable future. Difference attributable to the initial recognition of goodwill do not comprise temporary differences.

Deferred tax receivables relating to deficit deductions or other future deductibles for tax purposes are recognized to the extent that it is probable that the deductions can be set off against future taxable surpluses.

Fixed Assets

Fixed assets are accounted for at the acquisition cost with a deduction for depreciation according to plan. The acquisition value includes expenditure that is directly attributable to the acquisition of the asset.

When a component in a fixed asset is replaced, any remaining part of the old component will be disposed and the new component is activated.

Additional expenditures related to assets that are not divided into components are added to the acquisition value to the extent that the asset's performance increases in proportion to the asset's value at the date of acquisition.

Expenditures for repairs and maintenance are expensed. Depreciation according to plan is computed as follows:

Computer equipment 20%
Other equipment 20%
Buildings 2-4%
Goodwill 10-20%
Other intangible assets 10-20%

In cases where depreciation of goodwill is longer than 5 years, assessment has been made that the overvalue from acquisitions contains business relations and contracts that creates opportunities extending 6-10 years.

Financial Instruments

All financial instruments are measured and recognized based on acquisition cost in accordance with the rules of chapter 11, in BFNAR 2012: 1. Financial instruments recognized in the balance sheet include accounts receivable and other receivables, accounts payable, loans and derivatives. The instruments are recognized in the balance sheet when the company becomes a part of the instrument's contractual terms.

Accounts receivable and other receivables

Receivables are recognized as current assets, except for receivables with due dates more than 12 months after the balance sheet date which are classified as fixed assets. Receivables are recorded at the amount expected to be paid after deductions for individually assessed doubtful receivables.

Loan liability and accounts payable

Loan liability and accounts payables are recognized initially at acquisition value after deductions for transaction costs. If the reported amount differs from the amount expected to be repaid on the due date the difference is treated as interest expense over the term of the loan using the instrument's effective interest rate. Hereby on the maturity date the reported amount will be consistent with the expected amount to be repaid.

Documented hedges of financial assets and liabilities in foreign currency (hedge)

CellMark utilizes foreign exchange forward contracts to manage the currency risk arising from the purchase and sales in foreign currency. For these transactions normally hedge accounting is applied. When the transaction is concluded, the relationship is documented between the hedging instruments and hedged items, as well as the Group's risk management objectives and risk management strategy for hedging.

Currency forward contracts protect against fluctuations in exchange rates as the contract determining the rate at which the asset or liability in a foreign currency will be realized. When hedging of these transactions take place, hedging instrument is revalued due to changed currency exchange rates and currency future contracts are reported in the balance sheet. The entire effect of changes in exchange rates adjusts the value of the asset or liability hedging related.

Inventory

Inventories have been valued at the lower of cost or market, i.e. the lower of the acquisition value and the estimated net sales value. Net sales value refers to the goods' estimated selling price less selling costs.

Provisions

Provisions are recognized when there is a legal or informed obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. The time or the amount of the outflow may remain uncertain.

Cash Flow Statement

The cash flow statement has been prepared in accordance with the indirect method. The reported cash flow only includes transactions that have resulted in payments made or received. Besides cash, the company classifies the following as liquid funds: available balances at the bank and other credit institutions as well as short-term liquid investments listed on a major exchange that have

a shorter maturity than 3 months from the date of acquisition. Restricted funds are not classified as cash. Changes in restricted funds are reported in investing activities.

Estimates and assessments

When preparing financial statements and applying accounting principles, management is often required to make assessments, estimates and assumptions that are deemed as being reasonable at the time. Estimates and assessments are based on prior experience and several other factors, which, given the circumstances, are deemed as being reasonable. The results of this are used to assess the carrying amounts of assets and liabilities, when the exact amounts are not possible to obtain from other sources. The actual outcome could differ from these estimates and assessments. The estimates and assumptions that have a significant risk of material adjustments to the values of assets and liabilities within the next year are outlined the values of assets and liabilities within the next year are outlined:

Inventory obsolescence is made based on individual assessment.

Bad Debt for accounts receivable is made based on individual assessment.

Provisions for disputes are made if the outcome is expected to be negative.

Estimates and assumptions are regularly reviewed.

Definition of key ratios

Operating Income

Main revenue from operations, invoiced expenses, incidental revenue and corrections to revenue.

Profit after Financial Items

Profit after financial income and expenses, but before extraordinary income and expenses.

Total Assets

The company's total assets.

Equity Ratio (%)

Shareholder's equity as a percentage of total assets.

Note 23

Significant events after the end of the financial year

During 2020 the COVID-19 pandemic has affected large parts of the society. Based on the industry in which the Group operates and the products that the Group provides, no significant effects on order intake have been noted. Furthermore, it cannot be ruled out that continued similar development can have consequences on market prices for the Group's products, the Group's order intake and the opportunity to obtain and deliver goods.

The Audit Report was submitted April 27, 2020

Mr Johan Pauli Authorized Public Accountant

Mr Filip Larsson Authorized Public Accountant

The financial information provided on pages 38–66 is translated and retrieved from parts of CellMark AB's Annual Accounts which the Board of Directors has submitted for the financial year 2019. The Auditor's Report below is a translation of the Auditor's Report that KPMG has submitted regarding the complete Annual Accounts for 2019. This translation does not constitute the Auditor's Report submitted by KPMG, which for example means that it is not signed.

Auditor's Report

Report on the annual accounts and consolidated accounts

Opinions

We have audited the annual accounts and consolidated accounts of CellMark AB for the year 2019.

In our opinion, the annual accounts and consolidated accounts have been prepared in accordance with the Annual Accounts Act, and present fairly, in all material respects, the financial position of the parent company and the group as of 31 December 2019 and their financial performance and cash flow for the year then ended in accordance with the Annual Accounts Act. The statutory administration report is consistent with the other parts of the annual accounts and consolidated accounts.

We therefore recommend that the general meeting of shareholders adopts the income statement and balance sheet for the parent company and the group.

Basis for Opinions

We conducted our audit in accordance with International Standards on Auditing (ISA) and generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Other Matter

The audit of the annual accounts for year 2018 was performed by another auditor who submitted an auditor's report dated 6 May 2019, with unmodified opinions in the Report on the annual accounts and consolidated accounts

Other Information than the Financial Summary 2019 and consolidated accounts The Board of Directors and the Managing Director are responsible for the other information. The other information comprises "Financial Summary 2019" (but does not include the annual accounts and consolidated accounts and our auditor's report thereon) that we expect to be provided with after the signing of this auditors report.

Our opinion on the annual accounts and consolidated accounts does not cover this other information and we do not express any form of assurance conclusion regarding this other information.

In connection with our audit of the annual accounts and consolidated accounts, our responsibility is to read the information identified above and consider whether the information is materially inconsistent with the annual accounts and consolidated accounts. In this procedure we also take into account our knowledge otherwise obtained in the audit and assess whether the information otherwise appears to be materially misstated.

If we, based on the work performed concerning this information, conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and consolidated accounts and that they give a fair presentation in accordance with the Annual Accounts Act. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of annual accounts and consolidated accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts and consolidated accounts The Board of Directors and the Managing Director are responsible for the assessment of the company's and the group's ability to continue as a going concern. They disclose, as applicable, matters related to going concern and using the going concern basis of accounting. The going concern basis of accounting is

however not applied if the Board of Directors and the Managing Director intend to liquidate the company, to cease operations, or has no realistic alternative but to do so.

Auditor's responsibility

Our objectives are to obtain reasonable assurance about whether the annual accounts and consolidated accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts and consolidated accounts.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts and consolidated accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of the company's internal control relevant to our audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related dis-

closures made by the Board of Directors and the Managing Director.

- Conclude on the appropriateness of the Board of Directors' and the Managing Director's, use of the going concern basis of accounting in preparing the annual accounts and consolidated accounts. We also draw a conclusion, based on the audit evidence obtained, as to whether anv material uncertainty exists related to events or conditions that may cast significant doubt on the company's and the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts and consolidated accounts or, if such disclosures are inadequate, to modify our opinion about the annual accounts and consolidated accounts. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company and a group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual accounts and consolidated accounts, including the disclosures, and whether the annual accounts and consolidated accounts represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our opinions. We must inform the Board of Directors of, among other matters, the planned scope and timing of the audit. We must also inform of significant audit findings during our audit, including any significant deficiencies in internal control that we identified.

Report on other legal and regulatory requirements

Opinions

In addition to our audit of the annual accounts and consolidated accounts, we have also audited the administration of the Board of Directors and the Managing Director of CellMark AB for the year 2019 and the proposed appropriations of the company's profit or loss.

We recommend to the general meeting of shareholders that the profit be appropriated in accordance with the proposal in the statutory administration report and that the members of the Board of Directors and the Managing Director be discharged from liability for the financial year.

Basis for Opinions

We conducted the audit in accordance with generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors is responsible for the proposal for appropriations of the company's profit or loss. At the proposal of a dividend, this includes an assessment of whether the dividend is justifiable considering the requirements which the company's and the group's type of operations, size and risks place on the size of the parent company's and the group's equity, consolidation requirements, liquidity and position in general.

The Board of Directors is responsible for the company's organization and the administration of the company's affairs. This includes among other things continuous assessment of the company's and the group's financial situation and ensuring that the company's organization is designed so that the accounting, management of assets and the company's financial affairs otherwise are controlled in a reassuring manner.

The Managing Director shall manage the ongoing administration according to the Board of Directors' guidelines and instructions and among other matters take measures that are necessary to fulfill the company's accounting in accordance with law and handle the management of assets in a reassuring manner.

Auditor's responsibility

Our objective concerning the audit of the administration, and thereby our opinion about discharge from liability, is to obtain audit evidence to assess with a reasonable

degree of assurance whether any member of the Board of Directors or the Managing Director in any material respect:

- has undertaken any action or been guilty of any omission which can give rise to liability to the company, or
- in any other way has acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association. Our objective concerning the audit of the proposed appropriations of the company's profit or loss, and thereby our opinion about this, is to assess with reasonable degree of assurance whether the proposal is in accordance with the Companies Act.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

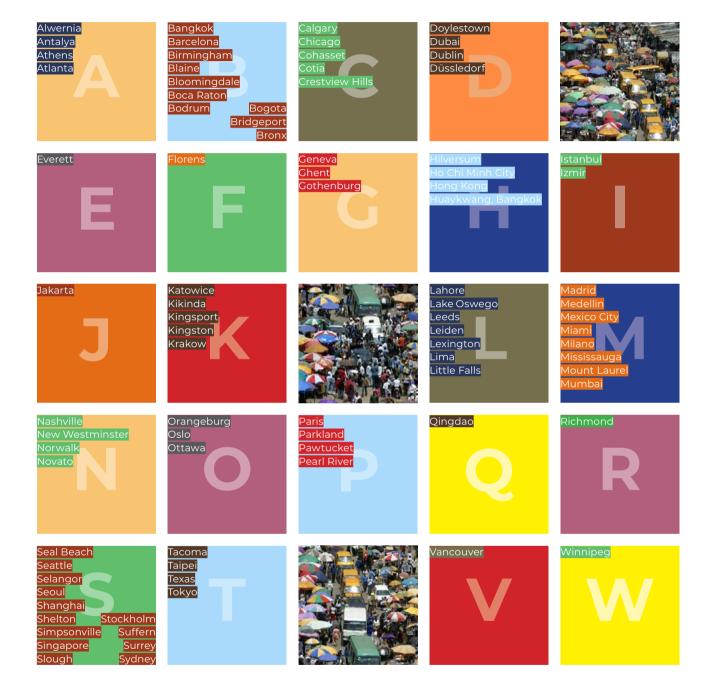

As part of an audit in accordance with generally accepted auditing standards in Sweden, we exercise professional judgment and maintain professional scepticism throughout the audit. The examination of the administration and the proposed appropriations of the company's profit or loss is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality. This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the company's situation. We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion concerning discharge from liability. As a basis for our opinion on the Board of Directors' proposed appropriations of the company's profit or loss we examined the Board of Directors' reasoned statement and a selection of supporting evidence in order to be able to assess whether the proposal is in accordance with the Companies Act.

Gothenburg, April 27, 2020

Filip Larsson Authorized Public Accountant

Education breaks the cycle of poverty

Education is a pathway to opportunity, a means of empowerment, and the only thing you can give to children that can never be taken away. The PaperSeed Foundation is honored to continue our partnership with CellMark and together we are on track to surpass 1 million children with life-changing education projects in 2020.

2019: The year in numbers

PaperSeed supported the work of 16 NGO and social enterprise partners and directly impacted the lives of over 296,960 children.

We are proud to recognize volunteer support from employees in CellMark offices spanning 12 countries: China, Hong Kong, Malaysia, Mexico, Japan, Singapore, Sweden, South Korea, Taiwan, Thailand, the United States, and Vietnam.

Our work would not be possible without our supportive business partners: Brian McClay & Associates, Bridge View Paper Company, CellMark, CMPC, Domtar, Hawkins Wright, NorCell, Nordea, Rottneros, Sappi, and SEB Bank.

Join us and make a difference

In partnership with PaperSeed, your company can make profound change in the world through our Corporate Social Responsibility Services. We select a portfolio that fits your organization's unique worldview and values, in regions where you work directly. And, because PaperSeed is underwritten by CellMark, 100 percent of your company's contribution will go directly to helping kids.

www.paperseed.org

Nigeria, with over 500 native languages, has the largest population in Africa. A land whose culture is comprised of some of the most important archeological finds in the world (an 8000 year old boat, the second oldest known world wide) to "Africa's biggest street party" – The Calabar Carnival.

George Osodi, a freelance photographer, was born in 1974 in Lagos where he is now based. He has taken it upon himself to showcase all aspects of this rich culture, honing in on projects that tell important stories, crucial insights into Nigeria's past and its current social climate. One of Osodi's ongoing themes is a photographic chronical depicting contemporary Nigerian monarchs portrayed in their extravagant, stately regalia. A reminder of a glorious past.

Osodi has received international attention, winning awards and exhibiting worldwide. He was awarded the Fuji African Photojournalist of the year in 2004 and shortlisted for the Sony World Photography Award in 2009. He has exhibited at Documenta 12, Kassel, Germany (2007); National Museum of Contemporary Art, Oslo, Norway (2009); Stedelijk Museum, Amsterdam, The Netherlands (2010); The Photographers' Gallery, London, UK (2012); Newark Museum, New Jersey, USA (2015); Liverpool Biennial (2018).
